

**Charting a course to** \_\_\_\_\_

**Lake Tahoe**

**TMDL**

**Implementation Workshop**

**29 January 2008**

\_\_\_\_\_  
**Clarity** <sup>1</sup>

# Workshop Goals

- 
- 1. Describe overall TMDL process and review research effort and findings**
  - 2. Introduce TMDL allocation, crediting, and regulatory concepts**

# Agenda

9:30 AM - Welcome, Introductions, and Agenda Review

9:40 AM - Context –TMDL Process?

10:00 AM - Baseline Loading Estimates with Q & A

11:00 AM - Clarity Model Overview and Findings with Q & A

11:30 AM - Load Reduction Estimates with Q & A

**12:30 – 1:30 Lunch (on your own)**

1:30 PM - Continued Question & Answer Period

2:30 PM - TMDL Implementation & Allocation Components with Q & A

2:45 PM - Allocation Approach with Q & A

**3:30 PM - Break**

3:45 PM - TMDL Crediting, Tracking, and Verification

4:15 PM - Overarching Q & A and Next Steps

4:30 PM - adjourn

---

# The Lake Tahoe Total Maximum Daily Load

A science-based  
plan for restoring  
Lake Tahoe's famed  
clarity

© QT Luong / terragalleria.com

# TMDL Core Questions

## Phase One – Pollutant Capacity and Existing Inputs

**What pollutants are causing Lake Tahoe's clarity loss?**

**How much of each pollutant is reaching Lake Tahoe?**

**How much of each pollutant can Lake Tahoe accept and still achieve the clarity goal?**

# TMDL Core Questions

## Phase Two – Pollutant Reduction Analysis and Planning

**What are the options for reducing pollutant inputs to Lake Tahoe?**

**What strategy should we implement to reduce pollutant inputs to Lake Tahoe?**

# TMDL Core Questions

## Phase Three – Implementation and Operation

**Are the expected reductions of each pollutant to Lake Tahoe being achieved?**

**Is the clarity of Lake Tahoe improving in response to actions to reduce pollutants?**

**Can innovation and new information improve our strategy to reduce pollutants?**

# **What the TMDL provides**

**Watershed scale restoration planning**

**Basin wide assessment of pollutant sources**

**Relative estimates of load reduction potential**

**Basin wide implementation concepts**

**Load reduction targets and Secchi depth milestones**

**Monitoring framework**

## **What the TMDL does not provide**

**Regulatory requirements and permit details**

**Jurisdiction specific implementation plans**

**Prescriptive load reduction measures**

**Detailed implementation costs**

**Identified funding sources**

# **What will we do with the TMDL information?**

**Identify load reduction and clarity milestones**

**Set load and waste load allocations for fine sediment, nitrogen, and phosphorus**

**Establish crediting/accounting mechanisms**

**Guide future permit requirements**

# **Where are we in the TMDL process?**

**2007 – Technical Report & Pollutant Reduction Opportunity Report**

**2008 – Drafting Load Allocations with Stakeholder input and Peer Review on Final TMDL ; amend CA Municipal NPDES Permits with regard to the numeric concentration effluent limits and the compliance date**

**2009 – TMDL Adoption**

**2010 – Renew CA Municipal NPDES Permits**

# The Clarity Challenge: Reverse clarity decline and measurably improve clarity
